

DreamPics™ Perfect Photo Guide

1. Get prepared.

- Wear solid-colored clothes without patterns, stripes, words or logos
- No hats, sunglasses, jewelry or props
- Use a plain background with even light (outside on a cloudy day, in light shade or inside with a big window behind the photographer works best for good light)

2. Capture quality shots.

- Avoid strong shadows on the subject
- Set camera to highest quality/resolution
- Shoot about 7 feet from subject
- Get on one knee (don't tilt up or down)
- Make sure you're focused
- Capture everything from head to toe

3. Have fun!

- Subject should act out their concept (superhero, astronaut, farmer, chef, etc)
- Try different expressions and poses
- Take at least 10-15 shots (our artists will choose the best one for the project)

4. Upload your images.

- Click email link to upload images
- Send the largest original version
- Don't edit, crop or add filters
- If you have any questions, visit foreverstudios.com/dreampics
